

I respectfully request that the FCC should not implement any proposal that would lesson a state's telephone privacy law protection. Indiana's TPL has made our evenings, especially meal times, enjoyable and pleasant. I do not want to be pestered by any company or dealer that I have previously had contact with. I am on a limited budget and if I want their service, I can contact them. Again, please protect my privacy as I cherish it as much as you do yours. Respectfull submitted,  
Bill Bergin
